Mobile is transforming the world as we know it.

Mobile supports 5bn+ subscribers globally 2/3 of the world’s population.

3.3bn people using mobile internet enabling access to vital services.
Networks are evolving

4G: world's dominant mobile technology

5G: first commercial networks will launch this year

Asia will account for about half of the world's 5G connections by 2025
Supportive regulatory environment is essential

Harmonised and affordable spectrum

Flexibility to share networks

Ability to manage traffic
Respecting and protecting our customers

Safeguarding user privacy

Accelerating digital identity

Driving inclusive growth and opportunity
